Allowable Subject Matter

1. Claims 1-5 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

Upon further consideration, prior art of record, taking individually or collectively, fails to fairly teach a particular apparatus for determining time difference between edges of a first digital signal and of a second digital signal including "if the second signal has a first level, said storage unit will store a signal level that is already stored in said storage unit of an immediately preceding one of said plurality of basic elements, and if the second signal has a second level, said storage element will retain a previously stored signal level; and a plurality of comparator units having outputs, each one of said plurality of comparator units receiving the signal level stored by said storage elements of two adjacent ones of said plurality of basic elements, each one of said plurality of comparator units supplying a different event signal at said output thereof when two identical signal levels are received from said storage elements of two adjacent ones of said plurality of basic elements than when two different signal levels are received" as claimed, in independent claim 1 (claims 2-5 depend therefrom). Thus, claims 1-5 are found to be novel and unobvious over prior art of record.
